Precipitation probability					
70%	60%	>95%	>95%	80%	90%

Forecast for Sunday 01 Nov 2020

Weather: Cloudy with periods of rain, heavy at times, though perhaps a drier and brighter spell mid-morning.

Chance of cloud free mountain/hill tops above 600m: Very little chance except for a brief time in morning, with a 40% chance then, mainly in east as cloud may lift and break off the hills.

Visibility: Poor, briefly good in shelter at lower levels in any drier interludes

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A windy and generally wet day, with winds over the tops possibly stronger than on tables at times. Some wind chill on the higher tops, especially early on, despite quite mild temperatures. Very difficult conditions with wind and rain and buffeting winds will cause mobility issues.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sun 01 Nov 2020	14.4mm	28.2mm	49.4mm

Forecast for Monday 02 Nov 2020

Weather: Another wet and windy night, with some heavy rain. Rain will clear after daybreak to leave a brighter, but colder and still windy day. Some sunny spells will develop but with a rash of blustery, occasionally heavy showers. Showers may be accompanied by hail and thunder, especially late afternoon and into the evening,

Maximum wind: Southwest 40 gust 60mph, turning west to southwest and decreasing 30 gust 45mph later,

Chance of cloud free mountain/hill tops above 600m: Nil at first, but then 60 or 70% with cloud on summits at times, but down to 450M in showers.

Visibility: Poor or very poor at first, then becoming mostly good, but falling to a few kilometres in showers

Temperature: **Valleys:** Falling to plus 11 Celsius as rain clears and colder air spreads in and to plus 6 C in evening
At 600m: Plus 12 C at first gradually falling to plus 5 C
Freezing level: Gradually falling to summit level by the end of the day
